

Model: C&P-UTS

Automated UT System

Coil & Plate UT System

The Coil & Plate UT System is for the volumetric laminar defect inspection within the thickness of the plates/coil of the material. The system is designed from 25% to 100% plate width coverage depending upon the test requirement. The probes are arranged in a multi-layered staggered pattern to provide the required scan coverage. The system also consists of a longitudinal plate edge holder with an edge-follower mechanism.

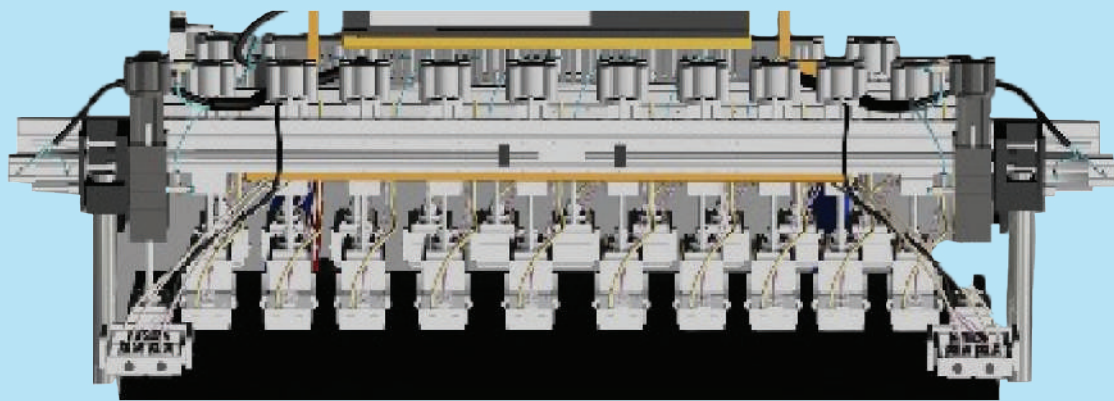

Features:

- Fully automated gantry based Ultrasonic Testing System.
- Multilayered probe arrangement.
- Offline calibration station in case of coil UT system.
- Advanced digital data acquisition and reporting system.
- Automated paint marking system.

Specifications:

- Coil/Plate width : 1000mm to 5000mm
- Thickness : 5 to 50mm
- Length : 5000 to 12000mm
- Testing temperature : Ambient temperature
